

Data Handling AirGradient Monitors and Data Platform

(v. 1.2 07082022)

AirGradient Data Encryption

All data sent from the air quality sensors to the server location are encrypted through HTTPS SSL encryption (SHA-256 with RSA Encryption). As a result the data cannot be read or changed during transfer.

AirGradient Server Locations

Customers of AirGradient have the choice of two server locations: **Singapore** or **Beijing, China**. For customers inside China, the Beijing server is the default but it can be switched to Singapore on customer request. All customers outside China will be on the servers in Singapore.

AirGradient Privacy Policy

The air quality data that our system collects belongs to you and will not be shared with 3rd parties without prior written authorization from you.

If you discontinue the service we will give you a copy of all the collected data and destroy the data.

You can request at any time a complete record of all data that we keep from you.

Data Protection Officer

If you have any questions or concerns, please contact our data protection officer Mr. Achim Haug at achim.haug@airgradient.com
